

At the moment, it is not possible to register on an individual basis for participation in the AMYPAD studies. In fact, potential AMYPAD participants will be recruited from existing population studies and memory clinic cohorts only.

In the case of the AMYPAD Diagnostic study, a patient with cognitive complaints must have visited a memory clinic with a participating physician. He or she can then be invited to take part in the research. If you are curious whether a memory clinic close to you is participating in AMYPAD, you can find the current list memory clinics and research hospitals below:

- **United Kingdom**

*Essex Memory Clinic*

Mental Health Unit, St. Margaret's Hospital, The Plain, Epping, Essex CM16 6TN
