

EANM FOCUS:
MOLECULAR IMAGING OF DEMENTIA - THE FUTURE IS HERE
January 31 – February 2, 2019, Cannes, France

The aim of the meeting is to provide an in-depth overview and critical assessment of the latest development and future directions in the management of dementia, with a focus on the role of neuroimaging in general and nuclear medicine in particular.

Our project coordinator Frederik Barkhof will give an oral presentation about AMYPAD and other European initiatives on Friday, February 1st.
