

Publishable Summary

AMYPAD-DPMS is the largest European study implementing amyloid-PET in clinical practice.

Its results will supply physicians and health care payers with real-world data to plan management decisions about reimbursement of amyloid-PET.

In order to monitor the AMYPAD-DPMS publication activities, a publication plan has been developed by the WP3 team in collaboration with the AMYPAD ExCom members. At the time of writing, 5 papers have been published, 2 papers are under review, and 7 works are still ongoing and will be submitted after study termination.

After study termination, the AMYPAD-DPMS data will be stored on a consultation and archive portal (Yareta, at the following link: <https://yareta.unige.ch/home/detail/7825f61b-6f8e-4fc2-a9df-cadfbcb84d2b2>) following the FAIR principles, and will be made available through Yareta upon request.
